REC

GE23131-Programming Using C-2024

Write a program that takes input:

The first line contains T, the number of test cases
Each test case contains an integer N and also the starting character of the chessboard

Output Format

Print the chessboard as per the given examples

Sample Input / Output

Input:

2
2
2 W

Let's print a chessboard!

3 B

WB

```
WB
BW
BWB
WBW
BWB
Answer: (penalty regime: 0 %)
     1 |#include<stdio.h>
    2 - int main(){
3 int T;
               main(){
int T;
scanf("%d",&T);
while(T--){
   int N;
   char s;
   scanf("%d %c",&N,&s);
   char first = s;
   char secondchar=(s=='B')?'W':'B';
   for(int i=0;i<N;i++)
   {
}</pre>
     5
6
7
     8
   10
11
12
                            for(int j=0; j< N; j++)
   15
16
                                  if((i+j)\%2==0)
    17
                                        printf("%c",first);
   18
19
                                  else
   20
   21
22
                                        printf("%c",secondcha
                                  }
   23
   24
25
26
                            printf("\n");
               }
   27 }
         Input Expected Got
        2
                 WB
                               WB
         2 W
                 BW
                               BW
                 BWB
         3 B
                               BWB
                               WBW
                  BWB
                               BWB
```

Passed all tests! ~

Question 3 Correct Marked out of 7.00 P Flag question

Decode the logic and print the Pattern that corresponds to given input.

If N= 3

then pattern will be:

10203010011012

**4050809

****607

If N= 4, then pattern will be:

1020304017018019020

**50607014015016

****809012013

*****10011

Constraints

2 <= N <= 100

Input Format

First line contains T, the number of test cases

Each test case contains a single integer N

Output

First line print Case #i where i is the test case number

```
10203010011012
**4050809
****607
Case #2
1020304017018019020
**50607014015016
****809012013
*****10011
Case #3
102030405026027028029030
**6070809022023024025
****10011012019020021
*****13014017018
*******15016
